

Square supply diffusers

AKL

Description

The AKL square diffuser is a twin of the AKP model with a solid face (instead of a mesh screen face) and side diffuser slots. The product is designed for use in low- and medium-pressure air supply and exhaust systems.

It can be used in steady and variable air flow systems. The temperature of the air supplied can be lower by up to 12°C than the indoor temperature. This enables using AKP diffusers in cold storage rooms. The recommended installation orientation is in the ceiling plane.

Material: galvanized steel sheet

Finish: powder-coated

Standard colours: RAL 9010

All RAL palette colours are available on request.
