

IZOL[®] system pre-insulated shutoff dampers**DATLI****Description**

The DATLI damper with gasket and marine type insulation is a regulating damper, built into the air distribution system, that allows for the change of the air flow resistance, and consequently change of the air stream. The DATLI dampers are a good choice when the ductwork closure must be airtight.

Available versions:

DATLI-10 - 10 mm layer of insulation
DATLI-16 - 16 mm layer of insulation

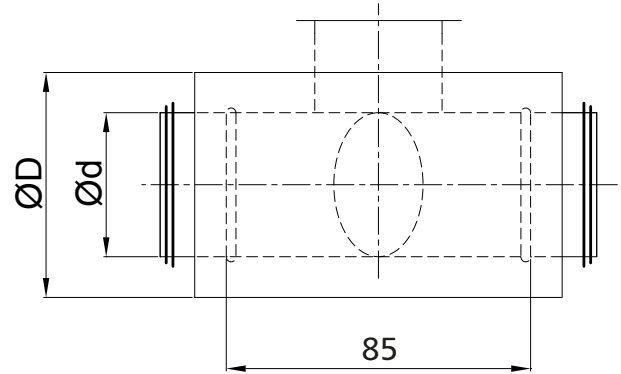

Available materials:

DATLI - galvanised steel and mineral wool insulation
DATLI-A - aluminium and mineral wool insulation

Product code example

Product code: **DATLI - 16 - 200**

type _____
insulation _____
Ød _____

Dimensions

10 mm insulation			
Ød [mm]	ØD [mm]	Ød [mm]	ØD [mm]
80	100	180	200
