IZOL®system pre-insulated airtight shut-off dampers

# DATLI

## Description

Airtight shut-off dampers with a double jacket made of galvanized steel and 16 mm mineral wool insulation, allowing partial or complete airflow closure. The DATLI dampers are a good choice when the ductwork closure must be airtight (DIN/EN 1751 Class 4).

**Available materials - product code example:**
DATLI-...-... - galvanized steel sheet
DATLI-K-... - stainless steel sheet
DATLI-A-... - aluminium sheet

**Product code example**
Product code: **DATLI - 16 - 200**
