

Female coupling made of EPP

EPP-15-MSF

Description

A female-male coupling made of expanded polypropylene (EPP) is used to connect the EPP-15 ducts, when the male part is cut off (e.g. when duct is shortened). The female coupling fits the outer diameter of the 15mm duct. The couplings are produced in 125, 160 and 200mm sizes.

Thermal conductivity: 0.038 W / m*K
 Airtightness class: ATC2 (D) @ 90 Pa
 acc. to PN-EN 17192:2019-01

Available materials:
 EPP-15-MSF-....- EPP (expanded polypropylene)
