

Self-adhesive elastomeric tape

FOAM-TAPE

Description

FOAM-TAPE Self-adhesive rubber foam tape is intended for insulation of ventilation systems, joining rubber foam sheets and insulating irregular shapes. Surface, to which FOAM-TAPE is applied, must be dry and clean and the temperature should be above 4°C.

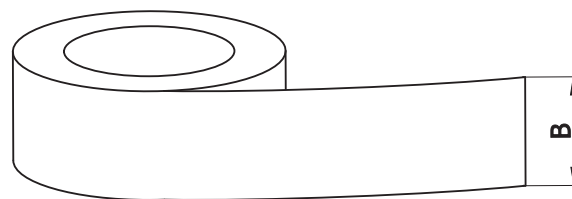

Width: 50 lub 75 mm
Length: 15 m
Thickness: 3 mm

Product code example

Kod product code: **FOAM-TAPE - 50 - 15**

type _____
 width B _____
 length _____

Dimensions

Code	Width B [mm]	Length [m]	Thickness [mm]
FOAM-TAPE-50-15	50	15	3
FOAM-TAPE-70-15	75	15	3

Technical data

Parameter	Standard	Value
Thermal conductivity λ W/(m ² K)	EN 12667	0.032 (-20°C)
Water vapour diffusion resistance μ	EN 12086	$\mu \geq 7000$
Temperature range	EN 14706	-40°C / +85°C
Density kg/m ³		45-60
Reaction to fire classification	EN 13501-1	B-s3, d0

Installation method

1. Connect preinsulated elements.

2. Remove the release paper and secure the joint connection with an adhesive FOAM-TAPE.
