

Perforated plastic-coated suspension tape for round ducts

PB-PP

Dimensions

Description

PB-PP Perforated plastic-coated (polypropylene) suspension tape for round ducts. This is an ideal solution whenever a fine adjustment of suspension height and level is required, or when regular suspension rings are not feasible.

Product advantages:

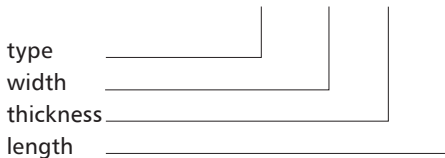

- is the ideal solution when you need to install round plastic ventilation ducts, i.e. wherever there is an aggressive environment, e.g. acids, alkalis - this material will not corrode.
- during the installation of plastic ducts for heat recovery units, you will not run the risk of cutting the outer surface of the material.
- If you are installing ventilation ducts outdoors, the PB-PP tape is ideal due to the weather-resistant plastic coating.

Available materials - designation example

PB-PP - galvanized steel coated with plastic PP

Designation example:

Product Code: **PB-PP - aaa - bbb - ccc**

| Type [mm] | A [mm] | L [m] | Thickness [mm] |
|----------------|--------|-------|----------------|
| PB-PP-14-07-20 | 14 | 20 | 0.7 |
| PB-PP-14-07-25 | 14 | 25 | 0.7 |
| PB-PP-19-07-05 | 19 | 5 | 0.7 |
| PB-PP-19-07-10 | 19 | 10 | 0.7 |
| PB-PP-19-07-20 | 19 | 20 | 0.7 |
| PB-PP-19-07-25 | 19 | 25 | 0.7 |
