

Long reducers

RSCLL/RSLL/RSCLFL/RSFL/RSCL/RS/RSCLF/RSFL

RSCLL

RSFL

Description

Long reducers are used in ventilation systems in industrial, office and housing buildings. They are installed in systems made of spiral ducts, bends and other fittings. The reduced diameter acts as a confuser to increase the air flow rate. When installed with the large diameter towards the incoming air flow, the piece works like a diffuser. All reducers are available in galvanized steel sheet, stainless steel sheet or aluminium sheet. Eccentric reducers are known as a reducers with one flat side, therefore they are used when the ductwork is supposed to be installed tight to the ceiling slab or onto the wall.

- RSCLL – concentric reducer with double male ends and EPDM gaskets
- RSLL – eccentric reducer with double male ends and EPDM gaskets
- RSCLFL – concentric reducer with male-to-female ends and an EPDM gasket
- RSFL – eccentric reducer with male-to-female ends and an EPDM gasket
- RSCL – concentric reducer with double male ends and without gaskets
- RS/ – eccentric reducer with double male ends and without gaskets
- RSCLF – concentric reducer with male-to-female ends and without gaskets
- RSFL – eccentric reducer with male-to-female ends and without gaskets
- $\varnothing d_2$ – suitable for SPR ducts
- $\varnothing d_1$ – suitable for SPR ducts or direct connections with fittings

Available materials — Product code example

- RSLL-... -... – galvanized steel sheet
- RSLL-K-... -... – 1.4301/304 stainless steel sheet
- RSLL-K-... -...-316L – 1.4404/316L stainless steel sheet, molybdenum-enriched
- RSLL-A-... -... – AW-1050A H24 aluminium sheet
- RSLL-CU-... -... – M1E z4 copper sheet
- RSLL-ZM-... – ZM310 coating (only up to a diameter of $\varnothing d_1 = 500\text{mm}$)

Product code example

Product code: RSLL - aaa - bbb
