Description

Spiral ducts type SPRI-Z-16 with a double jacket made of galvanized steel and 16 mm mineral wool insulation.

Standard length is 3000 mm, with wall thickness compliant with SPR duct standards. From diameter 250 mm, external corrugation is applied to increase stiffness and compression strength.

Available materials - product code example:
SPRI-Z-... - galvanized steel sheet
SPRI-K-...-... - stainless steel sheet
SPRI-A-...-... - aluminium sheet
