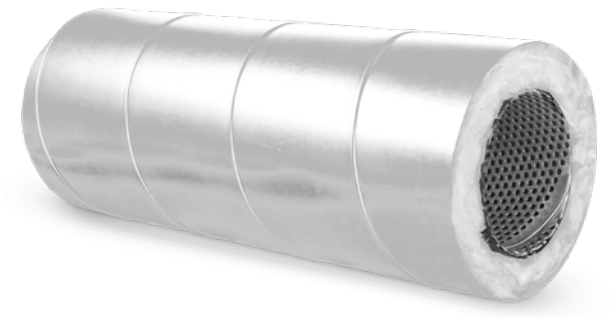
IZOL®system pre-insulated ducts

SPRPI



Description

Ventilation ducts with a double jacket made of galvanized steel and 16 mm mineral wool insulation, featuring a perforated inner liner. The design provides both thermal insulation and effective sound attenuation.

Standard length is 3000 mm, with wall thickness compliant with SPR duct standards. From diameter 250 mm, external corrugation is applied to increase stiffness and compression strength.

Available materials - product code example:
SPRPI-Z-...-... - galvanized steel sheet
SPRPI-K-...-... - stainless steel sheet
SPRPI-A-...-... - aluminium sheet
